

Feature Product

Self Closing European Hinges

APPLICATIONS

This hinge, with mounting plate, is for frame-less cabinets. It's designed for a 5/8" panel material and has an overlay adjustment range from 5/8" to 1/2" (see drawing below).

No magnets required here... these self-closing hinges keep your doors closed. Six way adjustability helps you hang your doors perfectly. The clip-on mounting feature allows easy door mounting after installing your new cabinets
