

Step Gauge 3D Ruler

Work faster... work better!

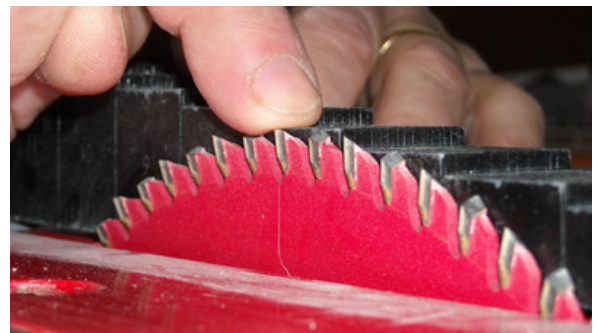

The Step Gauge 3D Ruler is a revolutionary tool that measures with high precision and accuracy in the shop or the job site.

Patented design allows you to measure height, width and length in one single step.

Easily determines small dimensions!
No more struggling with the first inch of a tape measure!

- Use for:**
- . table saw
 - . router
 - . drill press
 - . band saw
 - . cross cutting
 - . general layout
 - . plumbing...

Actually it's two rulers!

- Large ruler measures 1/8" inch measurements
- Smaller ruler measures 1/16" inch measurements
- Rulers nest inside each other for easy storage
- Use in combination with a level to quickly determine "out of plumb" conditions

"No Squint" precision: measure, calibrate and check your work - to the thousandth of an inch!

**This 3D Ruler will change the way you think about measuring things.
You will become more efficient and accurate.**

The advantage of having a precise, solid, durable 3-dimensional calibration device at hand **will save you time and prevent costly mistakes.**

Demo videos available on-line... blackjackcompany.com/videos.html

- Height Gauge - Gap Gauge - Step Gauge
- Positive Stop - Measure two dimensions at once
- Use to check height of blades and bits.
- Level shop equipment.
- Calibrate equipment- blade-to-fence, drill bit-to-table.
- Feel the difference - instantly feel to .004 accuracy!
- Gap Gauge- even distance between trim elements.
