

A-Line-It Deluxe

Setting up your machines for the perfect cut has never been an easy task.

Precision measuring tools were never made specifically for woodworking machines until now.

The **A-Line-It Deluxe** includes the extra long mounting bar convenient for checking router arbor run out; the round mounting pin for checking drill press table perpendicularity; the short bar for checking the parallelism of the thickness planer head to the table; the patented saw arbor nut; and the 22 piece dial indicator tip kit for measuring those difficult to reach points on power tools.

Designed by a woodworker for woodworkers!

- The A-Line-It Deluxe can be configured to do unlimited tests in your shop including:
- **Table Saw Alignment**
 - **Rip Fence Alignment**
 - **Drill Press Chuck Run-out**
 - **Saw Arbor Run-out**
 - **Rip Fence Alignment**
 - **Planer Alignment**
 - **Saw Blade Run-out**
 - **Rip Fence Straightness**
 - **Jointer Depth of Cut**
