

Thru Dovetail Jig and Accessories

BlackJack's Thru Dovetail Jig takes a simple approach to making dovetails.

The hardest part about making dovetails is matching and cutting the dovetail angles. *This is where BlackJack's Jig steps in. The math has been done for you!*

The exact cuts that you need have already been milled in this heavy duty dovetail jig.

Unlike other jigs, this jig will cut two different thickness and two different widths of stock. This means the projects you can create are virtually endless.

The 2 sided design of this jig gives you an extra wide surface for your router to glide on. Cut pins to one side of the template and tails to the other.

For smaller projects you can use a table mounted router & place the jig face down on the table with the project material rising upward.

Add this Clamp Set for faster board changes.

Your next project just got easier!

14205 Finer Points...

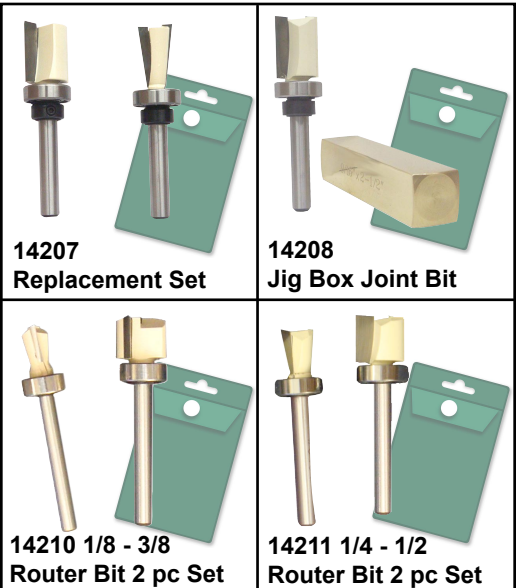

Template width: 15"	Normal pin spacing: 1-1/8" centre to centre	Dovetail Angle: 7 percent
Thickness range: 1/2" to 3/4"	Minimum router required: 1hp with 1/4" collet	Size: 2-1/4" x 3-1/2" x 18"
