

# Brad Nail Pusher

If you're tired of whacking your fingers when working with small brad nails, try this Brad Nail Pusher.

When working with small brad nails, this is possibly the handiest tool you can have in your tool box.

A magnet deep within the head of the pusher holds the nail firm inside the barrel while you position the brad **exactly where you need it.**

BlackJack's Brad Nail Pusher is designed to push into place brads up to 1" long with a head diameter less than 1/8".

### Instructions:

- Place brad into driver head first.
- Position driver onto project.
- Slowly depress handle by hand pressure to set brad in place.
- Set brad completely into project with multiple light blows to the handle top with a soft faced hammer or wooden mallet.

Handle colour may vary.
