

Router Bushings

Router Bushings - 11 pc Set Universal size fits most router brands and models

This solid brass set includes 7 bushings, 2 tension washers (to put tension on the nut preventing it from vibrating loose), & 2 nuts so you can have 2 routers set up with 2 different bushings at the same time.

- Useful for stair routing, pattern routing, hinge routing, general routing and dovetailing.

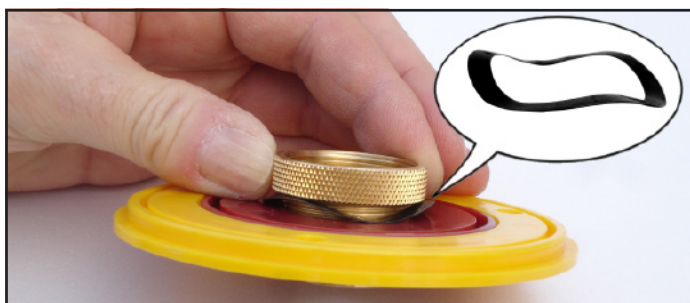

- Works with any template, pattern or jig for perfect duplicate routing of edges or interior surfaces.

Includes sizes: 5/16", 3/8", 7/16", 1/2", 5/8", 3/4" & 1"

Router Bushings 11 pc Set SPECIFICATIONS				
TPI	Thread	Part #	UPC	Min Qty
20	Coarse	17520	885732175208	1 Set

- Hinge mortising, making dados, or duplication of shapes... with this Router Bushing Set, you'll realize how handy it is to make your own templates.

If you've ever had your router bushing nut vibrate loose, you will appreciate these **Router Bushing Spring Washers!**

These spring steel washers fit perfectly over the thread of 1-3/16" bushings (standard PC size).

The nut will thread against the washer, collapsing it. The spring tension against the nut prevents it from vibrating loose.

Router Bushing Adapters

In the world of router table inserts, there are 2 distinct bushing sizes™ 1-3/16" (Porter Cable™) and 1-1/2" (Oak Park™, Lee Valley™). If you happen to own the 1-1/2" size (with 1-3/4" counter bore), **your problem has been solved!**

This bushing set converts from 1-1/2" to 1-3/16". A stepped ring is set into the 1-1/2" hole and then into it, you place the 1-3/16" bushing. A special nut supplied with the ring holds everything in place.

Please check your bushings for fine or coarse thread.

1-1/2 to 1-3/16 Router Bushing Adapters SPECIFICATIONS
